

A source of inspiration

Range 2011-2012

- . A wide range of complete foodservice solutions
- . Always bringing you new innovations and the latest trends
- . Where quality and style meet functionality

FOOD SERVICE

Our philosophy

The Sabert Corporation USA group owns production sites across the world:

- in the USA (3 sites)
- in Nivelles, Belgium, for Europe
- in China

The company specialises in manufacturing and marketing :

- **food packaging** designed to meet your specific needs and applications;
- disposable high-quality **tableware** carefully designed to enhance the appeal of your food presentation.

In developing and manufacturing its products, Sabert Europe is supported by :

- ongoing analyses of market trends to **identify needs**;
- **state-of-the-art manufacturing equipment** (extrusion and thermoforming);
- **a highly qualified workforce**;
- a team of engineers and designers dedicated to satisfying specific requests as part of **customised projects**;
- **innovative** production techniques;
- experienced, professional service in terms of both **quality** and **safety**.

Thanks to this dynamic market approach, you benefit from:

- **a vast range of complete solutions** to answer your day-to-day and/or specific needs;
- **a generous selection** of sizes, colours and shapes. Items are reusable and recyclable and blend quality and style;
- **a Cash & carry** range with packaging especially designed with easy, eye-pleasing display in mind;
- such **perfection** that some product categories (trays, tableware, etc.) look too good to be disposable;
- **original, cutting-edge** materials – always on trend and meeting your needs in terms of quality and functionality (PET, PP, CPET);
- **eco-responsible** products using rPET and PULP.
- durable benchmark products.

In a bid to continually improve service levels and quality, Sabert Europe attaches great importance to the independent inspection of all production and logistics operations.

This ongoing monitoring resulted in the company being awarded BRC/IOP(*) certification, recognised internationally as the quality standard in the food packaging industry.

This quality approach encourages Sabert to be especially dedicated when it comes to offering eco-friendly solutions, in particular through the Be Pulp range of products.

With a concern for future generations, Sabert has in addition already embarked on a number of initiatives to reduce its carbon footprint.

Philippe Leemans
General Manager Sabert Europe

A handwritten signature in dark ink, appearing to read 'Philippe Leemans', is written over a light grey background. The signature is fluid and stylized, with a long horizontal line extending from the end.

(*) BRC: British Retail Consortium - IOP: Institute of packaging

Working today for tomorrow

It's impossible nowadays to ignore the environmental impact of our conduct as consumers and our product. It is preoccupation for economic stakeholders, governments and citizens alike.

Here are a few figures that reflect the reality of this situation which is set to continue:

- biodiversity will be reduced by between 15 to 37% by 2050;
- species are becoming extinct 100 to 1000 times faster today than over the millions of years before.

We need to act now

It is easy to understand why eco-responsibility has been a priority for Sabert since 2007. We have striven to reduce our carbon footprint through a number of internal and external initiatives:

- endeavouring to reduce our energy consumption and favouring alternative energy sources (green energy, solar panels, etc.);
- reducing and recycling production waste;
- researching new eco-responsible materials and launching biodegradable products;
- upgrading our transport and packaging logistics, etc.;
- educating staff on sorting and recycling household and industrial waste and instilling new ways of behaving (use of FSC paper).

Be Pulp. A great eco-responsible initiative!

Be Pulp is a range made from the by-products of producing sugar cane juice or other natural materials; It is in plentiful supply and recyclable! Be Pulp plates, bowls, trays, cutlery, cups and napkins carry the Home OK Compost or OK compost, in accordance with European standard EN 13432. The eco-friendly range is also stylish and practical (microwavable, heat-resistant, robust, waterproof).

Paper products range

The image features a collection of decorative paper products. In the upper half, a stack of white plates is shown, with a white lace doily rolled up and secured by a black string, and another white lace doily placed on top. The lower half shows a gold-edged plate with a white lace doily underneath it. The background is a soft, out-of-focus white surface.

A rich and deep assortment to meet all your needs.
